This 3M personal protective equipment Misuse of personal protective equipment may For correct product selection and use, Over the years he's learned what it takes to satisfy a customer. Which, sometimes means going the extra mile literally. In the early 1990s, on a hot summer day in Columbus, OH, Art, then an employee of a local packaging supply company, received a call from a customer who had run out of packaging peanuts and therefore, were unable to ship any orders. With stock located over 100 miles away, his customer was facing a shut down situation. Art recognized the impact this could have on his customer and went to work exploring any and all options. Stock could be delivered the next day, but that wasn't good enough. Art decided to purchase some product from a local competitor and strapped it onto the top of his car. He recalls driving about 25 mph on back roads to his customer's location. Needless to say his customer was extremely happy and was shipping packages with almost no downtime. Art on right going the extra mile for his customer. Art has instilled these same values in everyone here at PacknTape and our everyday activities.
