Important Chapter 10 To maintain optimal print quality, we recommend that you use Canon brand FINE Cartridge. Replenishing ink only is also not recommended. Replace the FINE Cartridge promptly. Do not leave with the FINE Cartridge removed. Should missing characters or white streaks appear despite sufficient ink Note levels, see “When Printing Becomes Faint Or Color Is Incorrect” on page 85. Before the dialog box indicating that the ink has run out is displayed, the message is displayed on the LCD if the machine detects that the ink is low when you try and start printing. It also appears automatically during printing. When the “!” mark appears on the Low Ink Warning The ink level of the FINE Cartridge showing the “!”. However the same printing quality cannot be expected, compared to printing with both cartridges. In this case, the remaining level of ink cannot be calculated correctly. If you try printing when “” mark appears, the following message appears and printing stops. Follow the procedures below to clean these nozzles. Before Performing Maintenance Note Remove the FINE Cartridge once, then reinsert it into place. See “Replacing A FINE Cartridge”. Use this function when the printed results are blurred or the color is incorrect. The pattern print confirmation screen is displayed. Examine the nozzle check pattern output by the machine. If the lines are broken 1, or white lines 2 are present in the pattern A, replace the relevant ink tank. Chapter 10 Routine Maintenance. Cleaning the FINE Cartridge Nozzles consume inks, so perform FINE Cartridge Cleaning only when necessary. Ensure that the machine is turned ON and the Scanning Unit is closed. See “Replacing A FINE Cartridge” on page 76. If FINE Cartridge Deep

Cleaning does not improve the print quality even if Note you have replaced the Cartridge, contact a Canon service representative. Chapter 10 Routine Maintenance. With the machine ON, load a sheet of A4 or Lettersized plain paper in the Auto Sheet Feeder.

<http://www.amagato.com/images/bush-btu250dtr-user-manual.pdf>

Move the Paper Thickness Lever to the left position. Print the pattern. Column A Good example Most solid box Bad example Least solid box 2 Load the checked sheet on the Platen Glass. When loading the checked sheet, place the front side down, and align the upper left corner of the sheet with the alignment mark on the lower right corner of the Platen Glass. Caution Cleaning The Platen Glass And Document Cover Wipe the Platen Glass A, and the inner side of the Document Cover white area B with a clean, soft, lintfree cloth moistened with water. Then wipe with a clean, soft, dry, lintfree cloth making sure not to leave any residue, especially on the Platen Glass. The sheet of paper is automatically fed in and then out of the machine. Note Chapter 10 If there are no signs of improvement after performing three times, contact a Canon service representative. Routine Maintenance. Periodic cleaning of certain parts on the inside of your machine is recommended to maintain a high standard of printing quality. The parts can be cleaned in the following ways See "Cleaning The Bottom Plate". The paper is ejected. Inspect the discharged paper. This section provides troubleshooting tips for the most common printing Note problems. If you cannot find appropriate tips for your problem, refer to the on screen manuals. Depending on the model or brand of your device, you may have to select a print mode compliant with PictBridge before connecting the device. The FINE Cartridge may not be the compatible with this machine. Install the appropriate FINE Cartridge. FINE Cartridge nozzles clogged or shifted. Print Quality is not set properly. Media not loaded printside up. The paper stack exceeds the capacity of the Auto Sheet Feeder. There is some foreign matter in the Auto Sheet Feeder. The Paper Output Tray is closed. It may solve the problem. Delete an undesired print job, if there is any. The hard disk does not have enough available space.

<http://garantbouw.com/images/bush-9-inch-portable-dvd-player-manual.pdf>

When Copying Cause The document is not loaded correctly. The quality image quality displayed on the LCD is not suitable for the document. Follow the steps described below to clean the inside of the machine. 1. Inappropriate paper type is used. Thick paper is used. Media is curled. Chapter 11 Action Follow the steps described below to clean the paper feed rollers. 1. Ensure that the machine is turned ON and there is no paper loaded in the machine. Slide the paper guides against the paper stack. Action Use Photo Paper Pro or other Canon specialty paper to print images that have a high color saturation. See "Paper Types You Cannot Use" on page 16. Troubleshooting. If you cannot remove the jammed paper or the error still persists, contact a Canon service representative. Action Make sure all required boxes on the Photo Index Sheet are filled in, and that the sheet is set in the correct position and orientation on the Platen Glass. The error messages and operations may vary depending on the camera you are using. If you are using a nonCanon PictBridgecompatible camera and not sure how to clear the printer error from the camera, confirm the message displayed on the LCD of the machine and clear the error. Prepare a new FINE Cartridge. For problems when printing via Bluetooth communication, refer to the Bluetooth User's Guide.If the CDROM icon is not displayed on the desktop, there is a problem with the CDROM. Contact a Canon service representative.Make sure the CDROM is readable from Windows Explorer. ScanGear MP Wont Start Cause Scanner driver ScanGear MP is not installed. Machine may not be selected. The application program used does not support calling up ScanGear MP. An error message appears and the ScanGear MP window fails to appear. Specification of the application program. Dirty Platen Glass or Document Cover. The status of the original is poor. Parts Of Image Missing Or Surrounded By Extra White Areas Cause Scan area was specified larger than the original.

Observe the following outside the supported area.Error arising from Some application softwares do not support multiple image scanning. Scan each application software item individually without using the MultiScan or MultiCrop function. Scanned Image Is Not Displayed Properly Cause Scanned image prints out enlarged reduced. Scanned image enlarged reduced on the computer monitor. Scanned image wont open. Trouble scanning with MP Navigator Cause The original may not be scanned. A USB port is selected if either USBnnn Canon MP450 or MPUSBPRNnn Canon MP450 where n is a number is indicated. Once the waste ink absorber becomes completely full, printing cannot be done until the waste ink absorber is replaced. Canon recommends that you contact a Canon service representative as soon as possible. Action Disconnect the camera cable and reconnect the cable. The Scan Guide cannot be displayed. Canon support staff are trained to be able to provide technical support to satisfy customers. Attempts by customers to repair or take apart the machine will invalidate any Caution warranty regardless of whether the warranty has expired. Canon recommends that you print within this area. Recommended printing area dark blue The area where it is possible to print. Note that this uninstall procedure will uninstall all guides.If you do not have the original packing materials, pack the machine carefully using protective material and a sturdy box. Turn the machine OFF and unplug the machine. Printing on this paper is available only when the Layout function on your camera has a 16up option. See "Recommended Paper" on page 17.
